## PROFESSIONAL SUMMARY

Detail-oriented B.Tech Computer Science student specializing in Data Science with a strong foundation in machine learning, statistical inference, and full-stack development. Proven ability to build intelligent, data-driven applications from agricultural tech to financial engines using Python, TensorFlow, and React. Passionate about bridging the gap between complex data analysis and intuitive user experiences to solve real-world challenges.

## EDUCATION

|                                                                                                         |                                                     |
|---------------------------------------------------------------------------------------------------------|-----------------------------------------------------|
| <b>B. Tech. Computer Science &amp; Engineering</b><br>GITAM (Deemed to be University) - <b>9.7 CGPA</b> | <b>2023 - Present</b><br>Rudraram, Sangareddy Dist. |
|---------------------------------------------------------------------------------------------------------|-----------------------------------------------------|

|                                                           |                                             |
|-----------------------------------------------------------|---------------------------------------------|
| <b>Intermediate</b><br>Narayana Jr College - <b>96.4%</b> | <b>2021-2023</b><br>Mehidipatnam, Hyderabad |
|-----------------------------------------------------------|---------------------------------------------|

|                                                                      |                                      |
|----------------------------------------------------------------------|--------------------------------------|
| <b>10<sup>th</sup> Class</b><br>Narayana Concept School - <b>95%</b> | <b>2021</b><br>Panjagutta, Hyderabad |

## PROJECTS

|                                                   |                |
|---------------------------------------------------|----------------|
| <b>FinSight</b>   Python, React, Machine Learning | <b>Ongoing</b> |
|---------------------------------------------------|----------------|

- Developing an end-to-end platform to automate tracking of fragmented bank statements, converting unstructured data into real-time financial insights.
- Implementing a Multiclass Classification model (Scikit-Learn) to automatically categorize transactions (Utilities, Investments, etc.) with high precision.
- Performing extensive Exploratory Data Analysis (EDA) and Feature Engineering on raw CSV/PDF bank data to optimize model training and improve category prediction.
- Implementing localized processing logic to ensure secure handling of sensitive financial records within the application.

**AgriSmart** | Python, EXPO, React, Machine Learning

- Engineered a scalable software architecture for an IoT-enabled precision agriculture system, enabling the automated processing of real-time soil and environmental data.
- Defined a structured data model to handle simulated environmental inputs (Temperature, Humidity, pH), ensuring the backend is ready for future hardware integration.
- Developed a Machine Learning model to interpret environmental variables, providing automated recommendations for irrigation and crop suitability.
- Created a cross-platform dashboard using Expo (React Native) to visualize real-time system health and historical data trends through a clean UI.

**Voice Chess** | Python, Streamlit, APIs

**Ongoing**

- Collaborative development of a voice-activated chess platform designed to translate conversational commands into real-time engine moves.
- Leading the development of a robust Python backend to manage the core game logic, move validation, and synchronization of the live game state (FEN).
- Implementing a Llama-based NLP parser to interpret complex vocal inputs (e.g., "Attack the center with my pawn") and map them to valid UCI chess notations.
- Integrated the OpenAI Whisper model into the backend architecture to handle high-accuracy audio transcription and real-time command processing.

- Coordinating with frontend developers to define API specifications and ensure seamless communication between the voice-capture interface and the AI-driven backend.

#### **Dishventory AI** | Python , React , Kaggle, Prophet

- Led the backend development of a collaborative AI-driven management system designed to optimize kitchen inventory by predicting dish demand and reducing ingredient waste.
- Integrated a Prophet-based forecasting model to analyze historical sales data, delivering accurate demand predictions for high-volume menu items.
- Developed a React dashboard for restaurant managers to upload CSV/Excel files, visualize forecast trends, and monitor inventory insights
- Implemented a FastAPI /predict endpoint for automated demand prediction, enabling structured file uploads and real-time forecast generation.

## TECHNICAL SKILLS

---

**Languages** | C, Python, Java, JavaScript, R

**Frameworks** | React , Tensorflow , Scikit-learn

**Developer Tools** | Git, GitHub, Visual Studio Code, Expo

**Libraries** | Pandas, NumPy, Matplotlib

**Web Technologies** | HTML , CSS , Figma

## SOFT SKILLS

---

- Problem-solving
- Team collaboration
- Communication
- Analytical thinking
- Adaptability
- Project Ownership

## CERTIFICATIONS

---

- Version Control (Meta - Aug 2024)
- Advanced React (Meta - Aug 2025)
- JavaScript (Meta - Aug 2024)
- HTML and CSS in depth (Meta - Sept 2024)

## EXTRA-CURRICULAR ACTIVITIES

---

### **Tech Lead**

ENIGMA

**Sep 2025 - Present**

GITAM, Hyderabad

- Spearheaded the technical establishment of the club, defining the core technology stack and establishing standard development workflows for future growth.

### **Secretary**

DISHA

**Oct 2024 - Dec 2025**

GITAM, Hyderabad

- Managed administrative workflows and resource allocation for a core team of 20+ members, coordinating directly with university faculty.
- Successfully executed large-scale campus events and community initiatives, resulting in a measurable increase in student engagement and participation.
